## EXPERIENCE

JAN '20 –

### CONSOLIDATED EDISON INC.

FRONT END ENGINEER

Part of agile SCRUM team working on PWAs made with Typescript and Angular, consuming APIs created with .NET Core. Created archetypal camera functionality using Web API, utilized service workers to create native-like experiences, and leveraged Okta to create authentication and authorization flows for team's products.

JUN '18 – DEC '19

### CONSOLIDATED EDISON INC.

MANAGEMENT ASSOCIATE

Completed 18-month program of project-management assignments. A board of directors evaluated by my ability to cultivate leadership, communication, and critical thinking skills, I was able to juggle these assignments, while also leveraging JavaScript to implement UIs and digitized workflows when possible.

MAR'16 – JUN '18

### METROPOLITAN TRANSIT AUTHORITY

WEB DEVELOPMENT INTERN

Led team to help implement a jQuery-based work management system to automate and streamline processes previously done with pen/paper, whilst being accessible to field personnel anywhere.

## PROJECTS

APR '19

### SMARTCHARGE PLUS

NODEJS, PUPPETEERJS, REACTJS

Application that helped gain a more insightful understanding of electric vehicle charging data and savings I had accrued for a given month.

MAR '16 – JUN '18

### EZPARKN

REACTJS, NODEJS, SOCKET.IO, MYSQL

Worked with team of 8 to implement UI for a parking reservation application, including the use of Google Maps Platforms to render user locations of potential parking.

JUN '16 – AUG '16

### CUNY EHOS

ANGULAR5, NODEJS, MONGODB

Workflow management system which facilitates safety-related services at CCNY laboratories.

## EDUCATION

JUN '18

### THE CITY COLLEGE OF NEW YORK

B.ENG. COMPUTER ENGINEERING | GPA: 3.38
